Dear Parent/ Student,

This is to inform you that this sports physical is a simple screening exam to rule out major conditions affecting the human body.

This physical is not meant to and cannot detect all the congenital and genetic abnormalities of the heart. Also it does not detect blood disorders.

Please let us know if you have any concerns about this examination so that we can arrange for other more sophisticated test such as echocardiogram and blood test to rule out heart and blood disorders. (There are additional charges for these tests.)

**I have read the above statements and my questions have been answered.**
